System PAL-140

webra® Wall Barrier System PAL-140-Schwarzwald is high absorbent from both sides. The squared timber and the webra®-Duplex-abatement panels are between the vertical cylinder-wood, which is made from waterproof impregnated pine-wood. Finally the Profiled Timber will be screwed or nailed to fix the squared timber and the construction from both sides.

System IPBL-120

webra® Wall Barrier System IPBL-120-Schwarzwald has the same features like PAL-140 but much easier to install. Either the finished Wall (e.g. 2x2m manufactured by webra®) or each Wall Modules like the squared timber and the webra®-Duplex-abatement panels are locked between the steel H-Beam.

Webra®-Wall Barrier Systems can be excellent combined with climber or bush's to decorate the shape of Your garden or roadside.

Independent of the height of the Barrier, webra®-Systems have Less space need and are high effective.
